DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, a claim 2-4 in the reply filed on 11/3/05 is acknowledged. Claims 5-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group II, there being no allowable generic or linking claim. Election was made **without** traverse.

An Office action on the merits of claims 2-4 as follows:

2. This application is in condition for allowance except for the following formal matters:

The title

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The following title is suggested: "Method for assembly magnetic tape cartridge" or the like.

The specification

The specification is objected to because the related application No. 10/158,854 (specification, line 1) should be updated to: --US patent No. 6,857,593, issued February 22, 2005--.

The abstract of the disclosure should have been revised to readable on the method invention instead of the product. Correction is required. See MPEP § 608.01(b).

The Claims

a) "A" (claims 3-4, line 1) should be changed to: --The--, to read on the dependent claim formats. Appropriate correction is required.

b) Non elected claims 5-7 should be cancelled.

c) "combining"(claim 2, line 14) should be changed to:--mounting --.

* Further, Applicants' cooperation is requested in correcting any additional errors of which applicant may become aware in the claims and/or specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS from the mailing date of this letter.

3. The following is a statement of reasons for the indication of allowable subject matter: That the teachings of the prior art taken as a whole fails to teach or suggest obvious the combination limitations set forth in details in claim 2, including step of keeping a mounting position of the slide door by holding an end of the slide door facing a direction in which the slide door moves to close the opening with a chuck device.
